

PRICE LIST – Overhead Irrigation Systems

For Commercial Polytunnels – 16ft Wide to 24ft Wide

An overhead watering system is a simple and effective method of bringing water to your polytunnel, ensuring that the plants you have tended and nurtured receive just the right amount of water.

It is essential to consider the water **SUPPLY** and water **PRESSURE** when irrigating large areas, therefore **Premier Polytunnels** have used their expertise to design systems that you can rely on.

Two irrigation lines run along the length of the tunnel, ensuring the whole tunnel receives full coverage right up to the edge. The feeder pipe is suspended on two galvanised straining wires for added support.

ALL PRICES SHOWN ARE INCLUSIVE OF VAT.
